Experience

UzTransgas | Tashkent | Front-end, API Developer | June 2019 - May 2020

- Modification company's website
- Connecting web-services like payment systems, tax system etc. with company's system.
- Querying verious reports (using node.js)
- Started building modern look of available system and functionality (using Vue.js, Node.js, Java, I was Front-end developer position, team size was only 3)

Public-service LLC - Tashkent | Frontend developer, API developer | May 2020 - August 2021 |
Link web-app (Not Pulbic application) : ASKUGYUR

- We started develping large scale project with 4 team members, I was only front-end developer, and I created this web app from scratch, I worked 6-7 month on this project.
- I also created verious API, and API consumer clients services for getting daily usage of gas and daily payment from abonents and successfully connected and stored data to SQL-server database.

Side projects

- Currency-Converter, This is a test app and uses open api from https://www.cbr-xml-daily.ru/daily_json.js
- Muallimi-soniy, This is mobile application. I created it using native-script-vue cross-mobile framework.
- Alfam, This is the proejct for a construction and build related shop, client was intereseted in seeing his daily profit, workers participation on sale, and storing his all available items data to a database and getting verious reports about shop activity.
- Also created a web app client for Telegram-API, now under development
    - achieved: Authenticate using phone number or QR scanning, sending and receive message, read status check...
- **Macbro - Installments CRM**: I developed it from scratch everything. From DB Schema design to UI, Completed the project within almost 2 weeks. It has functionalities like: Sending SMS to customers, Role/Permission based authorization, Export to excel.
    - used techs
        - MongDB
        - NodeJS
        - Typescript
        - Element-UI
        - Vuejs-2
    - Some screenshots
